Taxable Distributions from a C Corporation

An estate or trust that is a shareholder in a C corporation must report as taxable gain the excess of the fair market value of a distribution (other than a dividend) in excess of current or accumulated earnings and profits over the adjusted basis of its stock when the adjusted basis of the stock is zero.

When a distribution, that is not a dividend, is received in excess of the current or accumulated earnings and profits, it decreases the basis of the stock or shares, but not below zero, by any distribution that is not taxable as a dividend on Line 2 of PA-41, Fiduciary Income Tax Return.

Once a distribution reduces the basis of the stock to zero, the excess distributions are taxable as gains from the disposition of property and reported on Schedule D, Line 4.

Example B. B Corp distributes from its capital account \$100,000 to the estate of John Doe, the only stockholder. The estate's adjusted basis in the stock is \$75,000.

The distribution is not from the regular corporation's earnings and profits, so it is not a taxable dividend.

The estate must reduce its basis from \$75,000 to zero, then report \$100,000 on the "Enter total distribution" line, and \$75,000 on the "Minus adjusted basis" line.

The estate reports the remaining \$25,000 as a gain on its PA-41 Schedule D.
