SUPPLEMENTAL INFORMATION

Pursuant to Chapter 90 of the Pennsylvania Vehicle Code, an alternative fuel dealer-user must pay tax on alternative fuels whenever such fuels are placed into the supply tank of an alternative fuel vehicle in Pennsylvania for use on public highways. Alternative fuels are taxed on a gallon-equivalent basis. Applicable definitions include the following:

Alternative fuel. Natural gas, compressed natural gas (CNG), liquefied natural gas (LNG), liquid propane gas and liquefied petroleum gas (LPG), alcohols, gasoline-alcohol mixtures containing at least 85 percent alcohol by volume, hydrogen, hythane, electricity and any other fuel used to propel motor vehicles on the public highways which is not taxable as fuels or liquid fuels under Chapter 90.

Alternative fuel dealer-user. Anyone who delivers or places alternative fuel into the fuel supply tank of an alternative fuel vehicle in Pennsylvania for use on public highways.

Gallon-equivalent basis. The tax is imposed on an adjusted rate basis detailed in the most recent PA Bulletin.

Alternative Fuels to be listed under Other –

	OCFT Subject to Discount	OCFT Not Subject to Discount
Hydrogen (GGE)	0.123	0.459
Ethanol (gals)	0.082	0.306
Methanol (gals)	0.062	0.230
M-85 (gals)	0.071	0.264

To determine the tax on a fuel not shown on the front of this form or in these instructions, provide a letter indicating the fuel type, the BTU content of the alternative fuel and other data as necessary to support the tax reported. This information would be reported under Other.

Conversion factors – To convert CNG or Hydrogen from standard cubic feet into Gasoline Gallon Equivalents (GGEs), use the formulas below.

CNG in standard cubic feet (scf):

Divide CNG (scf) units by 126.67 to convert to gasoline gallon equivalents (GGEs).

Hydrogen in standard cubic feet (scf):

Divide Hydrogen (scf) units by 357.37 to convert to gasoline gallon equivalents (GGEs).

Electricity factors – For electric powered vehicles, to calculate the kWh used, multiply the kWh it takes to charge the vehicle (see manufacturer specifications) by the number of times that the vehicle was charged in that reporting period. Keeping daily charging logs will greatly assist with the calculation.
